Project Title:

ArthriScan: A Multi-Modal Smartphone-Based Arthritis Detection System Using Machine Learning

- **Student Names:**

  Anlea Maria Jose

  Royan Dsouza

  Reuel Gomes

- **Roll Nos.:** 02, 21, 23 / Batch 1
- **Course:** ML Mini Project

- **Guide Name:** Dr. Joanne Gomes
- **Institute Name:** St. Francis Institute of Technology, Borivali

Motivation & SDG Mapping

- Problem motivation
- Real-world importance
- Mapped SDG(s)
- Why this problem matters

Problem Statement

- Clear problem definition
- Scope of study
- Research objective

Paper Details

Paper-1

- Title of selected paper
- Authors
- Year of publication
- Journal/Conference

Paper-2

- Title of selected paper
- Authors
- Year of publication
- Journal/Conference

Introduction of Paper-1

- Background context
- Why problem is important
- Key idea of paper

Methodology of Paper-1

- Dataset used
- Features
- ML algorithms
- Workflow diagram

Results & Evaluation of Paper-1

- Performance metrics
- Accuracy/Precision/Recall
- Graphs/tables

Summary: Strengths of Papers

- Literature Survey Table:

S.N.	Paper (Authors, Title, Year, Publisher)	What is good	Innovations	Assumptions

Summary: Limitations of Papers

- Literature Survey Table:

Paper (Authors, Title, Year, Publisher)	Weaknesses	Missing aspects	Assumptions

Research Gaps

- Improvements suggested by You
- Possible extensions by You

Your Proposed Idea

- Your improvement idea
- New approach
- Expected outcome

Conclusion

- Key learnings

References

- Paper citation
